Welcome to Estonian Business School (EBS), a global hub for cutting-edge business education. Established in 1988, EBS is renowned for its high-quality, practical business programs at the undergraduate, master's, and doctoral levels. With campuses in Tallinn, Estonia, and Helsinki, Finland, EBS fosters global collaboration through partnerships with over 60 universities around the world.

Whether you are an aspiring academic or a business professional, EBS offers exciting opportunities for collaboration, research, and industry impact. Join us on a journey of business innovation and professional growth, where the future of business education is being shaped today.

EBS will employ:

Professor or Associate Professor of Marketing

PROFILE & POSITION

EBS career model offers faculty and staff the opportunity to engage in a number of activity tracks:

- Teaching students and training professionals and executives;
- Research with a focus on practice-oriented and actionable research;
- Project work with private, public and civil society partners and clients;
- Venture-building and start-up investments turning knowledge and specialised know-how into value-adding businesses;
- Management and organisational activities, including team-building, sales and marketing, communication and international development activities.

The successful candidate for this position will join the teaching, research, and project team at EBS. They will be expected to play a central role in developing the school's research direction and

capabilities within their respective discipline, as well as making a strong contribution to project development within EBS in an interdisciplinary setting. Hence, a broad range of experience within the discipline would be a strong asset. The candidate should also demonstrate initiative and leadership potential as well as be involved in further developing the school's "knowledge-to-operationalization" related ecosystem, which aims to dramatically bridge the gap between academic and real-world settings

The successful candidate will be expected to conduct individual and collaborative thematic research projects leading to both academic and practically relevant outputs with a strong focus on actionability. The candidate will also be involved in developing grant and project proposals. (S)he will also be engaged in building collaborations with private, public, academic, and non-governmental organisations both in Estonia and internationally. Furthermore, the candidate will be engaged in the development of skills and supervising doctoral candidates and other faculty members.

In addition to activities related to research and development, the role will also include delivering challenging and innovative teaching and supervision at both undergraduate and graduate levels and participation in the competence-building and administrative activities of EBS.

Candidates with experience in collaboration with industry and public sector administrations through previous work experience, applied/experimental research and/or consulting activities are particularly welcome. Candidates are expected to have a PhD degree as well as a track record in academic publishing, teaching at university level and project experience.

OUR OFFER

We are committed to providing a stimulating and inclusive environment that nurtures academic excellence and personal growth. Your success is integral to the success of our institution, and we are dedicated to supporting you in every aspect of your professional journey.

- An attractive and varied working environment with the opportunity to shape and develop the field independently.
- Support in the conception of modern and innovative teaching.
- Access to research grants, resources and collaboration opportunities to advance your academic pursuits and contribute to the field, while also having the chance to work on diverse and interesting projects.
- Regular workshops, conferences, and seminars to enhance your skills, stay updated on trends and network with professionals in your field.
- Access to modern technology, well-equipped classrooms, the possibility to involve support staff and resources for achieving one's goals and assistance with administrative tasks management.
