Corvinus University of Budapest has over a 100-year-old history and is one of the leading universities in Hungary in Business and Management, Economics, and Social Sciences.

We are located in a stunning UNESCO Heritage building overlooking the Danube River, in the heart of Budapest.

We have been granted accreditation by EFMD and EAPAA and we are the only Hungarian business university to have two international institutional accreditations by AACSB and AMBA. Additionally, we are members of several international networks such as CEMS, BSIS, PRME, and CFA.

The Institute of Data Analytics and Information Systems is looking for a **Professor** for indefinite period.

The starting date is spring semester 2025.

Job description:

Teaching duties:

- Teaching subjects in the portfolio of the institute in weekly class hours

Research duties:

- Writing articles in prestigious international and domestic journals in the fields of artificial intelligence, information management, computer science, data science
- Participating at important international and domestic conferences,
- Research projects in the fields of artificial intelligence, information management, computer science, and data science

Service duties:

- Active participation in the professional public life of the institute and the university
- Supporting early-career academics and supervising PhD students and students participating in student competitions.
- Mentoring assistant professors and associate professors in the institute.

Essential qualifications and experience:

- PhD degree and habilitation in any relevant discipline
- Teaching and research experience in higher education: min 800 contact hours of which 80 are in English language
- Course leader duties (at least one compulsory course or at least two optional courses)
- Verifiable teaching development activity (curriculum development, methodological development): editor, first author, sole author or co-author of at least one coursebook or textbook, or a teaching aid or digital teaching material of 100 or more pages
- Publication track record in highly ranked journals in the areas of artificial intelligence, information management, computer science, data science
- Internationally recognised outstanding scientific performance: authorship of at least two international (written in English) Q1 or Q2 articles (one of them must be Q1) and the applicant is the sole or first author of at least one of them. (One of these Q1/Q2 articles in the applicant's field may be substituted by a book or part of a book published in English by a prestigious international publisher.)
- English teaching experience in artificial intelligence, information management, computer science, data science
- Track record of PhD supervision in any relevant discipline
- Membership at relevant national and international scientific organisations
- Experience in leading or participating in national or international research projects.

Desirable experience:

- Feedback (student evaluation, evaluation of direct supervisor)
- Research activity with international impact, international citation (verifiable)
- Active role in the activities of doctoral programmes
- Talent management
- Coordination of research groups with the involvement of doctoral students and young colleagues
- Participation in international conferences, membership in international networks
- Participation in the work of professional organisations
- Participation in the editing and/or membership in the editorial staff of domestic and international journals

Remuneration and benefits:

- A competitive salary is accompanied by a 15% bonus in case of outstanding performance
- One time relocation support for candidates moving to Hungary
- Cafeteria allowance

Application procedure:

- The closing date is on 2025. 02. 23.
