Assistant professor in Management

To foster the continuous development of the department of Management of Innovation and Entrepreneurship at Ecole polytechnique, we invite applications at the rank of Assistant Professor in the field of Management with a desired focus on organizational innovation and/or innovation strategy and processes and/or entrepreneurship, starting September 1, 2023. Applications should be made before February 28th 2023.

About the school

Ecole polytechnique is a leading French engineering school. The school offers management courses to strongly selected engineering students with a high-level scientific background and a pluridisciplinary curriculum. Ecole polytechnique is developing Master of Science and Technology degrees, bachelor degrees and executive education programs in addition to the historical polytechnicien engineering degree and PhD programs. Because of the identity of the school and its role in the development of science and technology, innovation management strategy and entrepreneurship are crucial in these programs.

Ecole polytechnique is located in Palaiseau, (about 30 min from Paris) within an ecosystem of higher education institutions (HEC, Ecole Centrale, Sup optic, Telecom, Agro-ParisTech ...), companies (EDF, Danone, Carrefour, Thales, Safran...) and research centers (CEA, INSERM, CNRS ...) called Plateau de Saclay. Because of the scope and excellence of the research centers of the school and the strength of its alumni network, Ecole polytechnique is well positioned to play a leading role in the development of the ecosystem. Ecole Polytechnique offers thus an attractive environment for developing an original research program. In addition, the setup of IP Paris in 2019 reinforces the opportunities of collaborations with close partners of Ecole polytechnique also members of the Institute (Telecom, ENSTA, ENSAE).

More information about Ecole Polytechnique is available online at: <https://www.polytechnique.edu/en>

Job Qualifications

The successful candidates will hold a PhD in management, demonstrate an active research agenda, a solid record of publications and/or the potential to publish in leading academic journals. He/she will

provide evidence of strong teaching skills for a varied audience from bachelor to executive profiles. An experience of teaching engineering students or involvement in mixed academic programs (with either a business or a scientific background) would be appreciated.

Job Overview

The successful candidates will potentially teach courses in both core and specialty subjects. He or she may have the opportunity to develop new courses on their own specialities, for instance on topics such as (non-exhaustive list): innovation management, innovation strategy, innovation project management, health management, innovation in the health sector, entrepreneurship, social innovation, management of public systems, management control of innovation projects, innovation and human resources, digitalisation of organisations, innovation marketing.

The successful candidate is expected to develop his or her research activity within the research team Center for Management Research (CRG) and the Interdisciplinary Institute for Innovation (<http://www.i-3.fr/en/presentation/>),

Teaching will be mainly in English. However, a good working knowledge of the French language would be a strong asset, for informal interactions with other faculties and working activity with administrative staff and the development of company projects.

Application procedure

Documents that will be required for application are the following: curriculum vitae, full list of publications, cover letter, a proposal for a new course, two selected publications, and the names and addresses of maximum three references.

Interested candidates are invited to contact the Head of the Innovation Management & Entrepreneurship Department, Prof. Florence Charue-Duboc, florence.duboc@polytechnique.edu or the Director of the Management Research Centre i3-CRG, Prof. Etienne Minvielle, etienne.minvielle@polytechnique.edu.

Applications must be made directly via École polytechnique's website (<https://candidatures-calliope.polytechnique.fr/calliope-fo/recherche/index.php?lang=en>) and should contain (among other documents listed on the website) a research statement (outlining a research project to be conducted at the research center) and teaching statement (outlining one or several new teaching modules/courses that the applicant would wish to develop). For further information or questions about the application process, please contact Ms. Carine Robert, carine.robert@polytechnique.edu.
