Associate/Full Professor in Supply Chain Management | School of Business and Economics | 1.0 FTE

Do you want to be part of the Department of Marketing & Supply Chain Management at the School of Business and Economics? We are passionate about delivering top-notch education and conducting cutting-edge research, and we are on the lookout for exceptional candidates like you to be a part of our team. Join us in shaping the future of Supply Chain Management!

Job Description

The job

The department of Marketing & Supply Chain Management (School of Business and Economics) is committed to providing high-quality education and to conducting high-quality research. We invite candidates in Supply Chain Management (including any sub-field such as Logistics, Operations management, Purchasing and Supply management) to apply. We particularly invite applications from candidates with expertise in Digitalization of supply chains, Sustainable Supply Chain Management, Supply Chain Innovation, Supply Chain Operations, and/or Logistics. The candidate should have a track record of empirical research in such a domain and a willingness to engage with others inside and outside the department to expand this research line further. This is a position with a duration of 4 years, with the possibility of extension and early permanency depending on research, education, outreach, citizenship, service, and funding acquisition performance.

The department also includes the Brightlands Institute for Supply Chain Innovation ([BISCI](#)), an innovative Triple Helix institute focused on developing smart and sustainable innovations within supply chain ecosystems. BISCI actively crosses over among the separate Brightlands campuses (independently focused on data, raw materials, nutrition, and health) and is embedded in existing supply chain ecosystems, in the region and beyond. The institute offers the candidate unique opportunities to collaborate with business and public organisations and to develop novel research streams in the domain of ecosystem governance.

We are looking for a colleague who is committed to excellence in research and executive teaching. The candidate has a proven track record of research published in the top SCM/OM journals and is an

active member of the SCM research community and journal editorial boards. We are seeking a colleague that can work with our faculty and PhDs to continue and expand these lines of inquiry. The candidate will teach (post)graduate, or executive courses through our face-to-face, problem-based learning (PBL) instructional format, supervise Master and PhD students and contribute to the department's educational development activities. Moreover, the candidate is interested in collaborating with public/private organisations and is empowered to create impact to the outside world via BISCI.

Your activities

The department offers a stimulating research environment and encourages its members to enhance their (inter)national research network. As a result, the candidate will participate in our research and educational development activities, and is receptive for teamwork within our department, school, and university. We are seeking for a colleague who will support and elevate our ambitious SCM group in its research goals.

In addition, the candidate will contribute to educational Innovation, which is high on the strategic agenda of the School of Business and Economics, University Maastricht. A critical success factor is the development and implementation of state-of-the-art courses in (under)graduate programs. The candidate will serve as a course coordinator for at least one course per year. Given the nature of PBL, the course coordinator is also responsible for the coaching and instruction of tutors.

Apart from education and research, our school also recognizes and rewards societal impact and academic leadership. The candidate is expected to transfer knowledge and expertise to the outside world (societal impact). For example, through projects for companies via BISCI or involvement in our executive programs. Finally, all faculty takes responsibility for administrative services at the department or school at large (academic leadership). The allocation of tasks is done by matching needs of the department and personal preferences.

Requirements

We are looking for the following in the ideal candidate, by the time of appointment:

- A PhD in Supply Chain Management (or subdomains such as operations management, logistics, purchasing and supply management), or a related field;
- A strong research profile, evidenced by a track record of scientific publications in top journals in SCM (e.g. JOM, IJOPM, JBL, POM, SCM:IJ, JSCM, JPSM);
- A research agenda that accommodates digitalisation and sustainability themes are a plus;
- Extensive experience in supervising PhD students;
- Active member of SCM-relevant communities such as Academy of Management (OSCM division), Production and Operations Management Society (POMS), and the European Operations Management Associations (EurOMA);
- Experience in teaching and/or coordinating graduate courses.

What we offer

As an Associate/Full Professor in Supply Chain Management at the School of Business and Economics, you will be employed by the most international university in the Netherlands, located in the beautiful city of Maastricht. In addition, we offer you:

- Good employment conditions. The position is graded in scale 13 or H2 according to UFO profile Associate Professor 2 (UHD2) or Full Professor 2, with a corresponding salary scale based on experience between € 6,002 to € 9,680 gross per month (based on a full-time employment of 38 hours per week). In addition to the monthly salary, an 8.0% holiday allowance and an 8.3% year-end bonus apply.

- An employment contract for a period of 48 months with a scope of 1,0 FTE. Upon proven suitability, the employment contract will be converted to an indefinite contract.
- At Maastricht University, the well-being of our employees is of utmost importance, we offer flexible working hours and the possibility to work partly from home if the nature of your position allows it. You will receive a monthly commuting and internet allowance for this. If you work full-time, you will be entitled to 29 vacation days and 4 additional public holidays per year, namely carnival Monday, carnival Tuesday, Good Friday, and Liberation Day. If you choose to accumulate compensation hours, an additional 12 days will be added. Furthermore, you can personalize your employment conditions through a collective labor agreement (CAO) choice model.
- As Maastricht University, we offer various other excellent secondary employment conditions. These include a good pension scheme with the ABP and the opportunity for UM employees to participate in company fitness and make use of the extensive sports facilities that we also offer to our students.
- Last but certainly not least, we provide the space and facilities for your personal and professional development. We facilitate this by offering a wide range of training programs and supporting various well-established initiatives such as 'acknowledge and appreciate'.

The terms of employment at Maastricht University are largely set out in the collective labor agreement of Dutch Universities. In addition, local provisions specific to UM apply. For more information, [Click here](#)

Why work at Maastricht University?

At Maastricht University (UM), everything revolves around the future. The future of our students, as we work to equip them with a solid, broad-based foundation for the rest of their lives. And the future of society, as we seek solutions through our research to issues from all around the world. Our six faculties combined provide a comprehensive package of study programmes and research.

In our teaching, we use the Problem-Based Learning (PBL) method. Students work in small groups, looking for solutions to problems themselves. By discussing issues and working together to draw conclusions, formulate answers and present them to their peers, students develop essential skills for their future careers.

With over 22,300 students and more than 5,000 employees from all over the world, UM is home to a vibrant and inspiring international community.

Are you drawn to an international setting focused on education, science and scholarship? Are you keen to contribute however your skills and qualities allow? Our door is open to you! As a young European university, we value your talent and look forward to creating the future together.

The School of Business and Economics

The School of Business and Economics (SBE) is one of Maastricht University's six faculties. Our mission is to contribute to a better world by addressing societal problems, by co-creating knowledge and developing team players and leaders for the future.

By joining SBE, you will be part of the 1% of business schools worldwide to be Triple Crown accredited (EQUIS, AACSB and AMBA). You will join an inspiring and international environment, where learning and development is priority.

Department of Marketing & Supply Chain Management

The Department is committed to excellence in teaching and research. We provide our students with

the best possible education, at the Bachelor, Master, PhD and Executive level. We always strive to bridge the gap between academic rigor and real-world impact by integrating real-life cases and projects into our programs. At the Bachelor's level, we offer a Major in Marketing and a Major in Supply Chain Management. At the Master's level, we offer four challenging Master's programs: International Business Strategic Marketing, Marketing-Finance, Supply Chain Management, and Global Supply Chain Management and Change.

Our research is published in the top academic journals and has been rewarded with several international awards and is often funded by prestigious grants from NWO (The Netherlands Organization for Scientific Research), the European Union, the NEVI (Dutch Association for Purchasing Management) Research Foundation, or the Marketing Science Institute. We are proud of our excellent reputation in our fields of expertise and enjoy sharing our knowledge with the business community to help solving some of the pressing questions that managers face.

Curious?
